SECTION A - GENERAL APPLICATION AND INSTRUCTIONS

ITEM 1 PURPOSE AND APPLICATION.

PURPOSE.

This General Services Administration (GSA) BASELINE RATE PUBLICATION No. 1000-D (GSA No. 1000-D) is designed to afford carriers a simple method of expressing and filing Freight-All-Kinds (FAK) rate tender(s) for the civilian agencies of the U.S. Government. Its purpose is to provide the standardization necessary to achieve a fully automated system for rating and routing traffic, without requiring substantive changes in the manner in which rates for this traffic have traditionally been stated.

APPLICATION.

The baseline rates and minimum charges contained in this publication shall serve as a basis for carriers to submit actual rates and charges for Minimum Charge (MC), Less Than Truckload (LTL), or Truckload (TL) shipments from, to, or between all points in CONUS.

GOVERNING RULES.

Rates and charges offered to a civilian agency using this publication will be subject to the rules, accessorial services, and accessorial charges contained in General Services Administration (GSA) NATIONAL RULES TENDER No. 100-D (GSA No. 100-D) and supplements or reissues thereto.

GSA BASELINE RATES AND MINIMUM CHARGES.

The rates and charges shown in this publication were established at a baseline level above, below, or equal to motor tariff bureau class 50 rates as of January 1, 1989. These rates and charges were subsequently realigned on April 1, 1990, and increased by 13.6 percent on September 1, 1993. This is not in any way to be construed as the setting of rates or charges by GSA. Carriers must independently establish their own levels of Minimum Charge (MC), Less Than Truckload (LTL), or Truckload (TL) rates only by utilizing a percentage above, below, or equal to the level of baseline rates and minimum charges shown in SECTION B, ITEM 100 TABLE OF BASELINE RATES AND MINIMUM CHARGES of this publication.

APPLICATION OF GENERAL RATE INCREASES.

The baseline rates and charges contained in this publication will be adjusted on an as needed basis.

ITEM 10 REVISING PUBLICATION PROVISIONS AND METHOD OF CANCELING ORIGINAL OR REVISED PAGES.

This TOS will be revised by the Freight Program Management Office (6FBX), Kansas City, MO through publication of the changes on GSA's WorldWide Web Page (<http://www.kc.gsa.gov/fsstt>), the issuance of page revisions (original or revised), or the reissuance of the document on an "as needed" basis.

- A. TOS Page Revisions: Reserved
- B. Reissuing the TOS: Reserved

ITEM 20 DISPOSITION OF FRACTIONS.

Fractions of a cent resulting from the application of a carrier's independently established percentage(s) of the baseline rates and minimum charges shown in SECTION B of this publication, shall be disposed of as follows:

- A. Fractions of less than onehalf of one cent shall be omitted; and
- B. Fractions of onehalf of one cent or greater shall be increased to the next whole cent.

ITEM 30 EXPLANATION OF GSA BASELINE RATES AND MINIMUM CHARGES.

The rates in SECTION B, ITEM 100, TABLE OF BASELINE RATES AND MINIMUM CHARGES herein are shown in cents per 45.36 kilograms (cents per hundredweight [cwt]). The minimum charges in SECTION B herein are shown in dollars and cents.

ITEM 40 DISTANCE BASE- EXPLANATION AND APPLICATION.

Each distance base (kilometers [miles]) established in conjunction with the distance table of rates contained in SECTION B, ITEM 100, TABLE OF BASELINE RATES AND MINIMUM CHARGES herein shall apply to all distances within the grouping (i.e., 162.54 kilometers [101 miles] through and including 193.12 kilometers [120 miles]). All distances shall be computed by use of the applicable Household Goods Carriers' Bureau Mileage Guide(s) as shown in ITEM 10 GOVERNING PUBLICATIONS in the GSA NATIONAL RULES TENDER No. 100-D herein, or supplements or reissues thereto or any combination of both guides.

ITEM 50 METRIC CONVERSION.

The weights and measurements expressed in this publication are being changed to indicate only metric measurements. This change will be accomplished in the four steps (paragraphs A through D) shown below:

- A. First step. In the 1992 edition of the No. 1000-B, the appropriate weight or measurement (inches, feet, miles, or pounds) will be first expressed after which the metric equivalent (centimeters, meters, kilometers, or kilograms) will be parenthetically shown.
- B. Second step. In the 1993 edition of this document (GSA No. 1000-C), the exact opposite will be shown, i.e., first the appropriate centimeters, meters, kilometers or kilograms will be indicated after which the customary weight or measurement (inches, feet, miles, or pounds) will be parenthetically shown. The metric conversion in this step does not require tenders to be predicated upon metric measurement. Only when the fourth step, below, is implemented, will carriers be required to submit their tender filings based upon metric measurement.
- C. The third step in implementing the conversion will be to round the metric weights and measurements expressed in paragraph B to a whole number and, in turn, to translate the "whole" metric number to equivalent U.S. weights and measurements. (In some instances, the conversion process may result in mixed numbers, i.e., a number containing a whole number and a fraction.) The implementation date and process to be used in this step, as well as the implementation date of paragraph D below, has not yet been determined; however, there will be sufficient advance notice given to the carrier industry prior to the implementation of paragraph C and D.
- D. The fourth and final step of the conversion process will be to display only the metric system of measurement (eliminating the customary U.S. weight and measurement in parenthesis).

SECTION B - TABLE OF BASELINE RATES AND MINIMUM CHARGES**ITEM 100 TABLE OF BASELINE RATES AND MINIMUM CHARGES.**

The following table identifies the minimum weight columns used in the distance table of rates in this ITEM. The metric weight equivalents in kilograms are listed first with the customary weight shown in parenthesis. This ITEM also shows the distance expressed in kilometers and miles (one mile equals 1.6093 kilometers).

DEFINITION OF MINIMUM WEIGHT COLUMNS IN THIS SECTION

<u>MINIMUM WEIGHT COLUMNS</u>		<u>DEFINITION</u>
	MC	Minimum Charge- Applies per shipment
226.8 kilograms	L5C	less than 226.8 kilograms (500 pounds)
226.8 kilograms	5C	226.8 kilograms (500 pounds) but less than 453.6 kilograms (1,000 pounds)
453.6 kilograms	1M	453.6 kilograms (1,000 pounds) but less than 907.2 kilograms (2,000 pounds)
907.2 kilograms	2M	907.2 kilograms (2,000 pounds) but less than 2,268 kilograms (5,000 pounds)
2,268 kilograms	5M	2,268 kilograms (5,000 pounds) but less than 4,536 kilograms (10,000 pounds)
4,536 kilograms	10M	4,536 kilograms (10,000 pounds) but less than 9,072 kilograms (20,000 pounds)
9,072 kilograms	20M	9,072 kilograms (20,000 pounds) but less than 13,608 kilograms (30,000 pounds)
13,608 kilograms	30M	13,608 kilograms (30,000 pounds) but less than 18,144 kilograms (40,000 pounds)
18,144 kilograms	40M	18,144 kilograms (40,000 pounds) and over

ITEM 100 TABLE OF BASELINE RATES AND MINIMUM

Rates are expressed in cents per hundredweight [cwt] (cents per 45.36 kilograms)
